

# XTRUDEWORKS, LLC

## OUR SERVICES

### Mechanical Design

Custom part and system designs for performance, reliability, and efficiency across multiple industries.

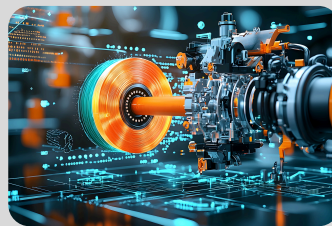

### Prototyping Assistance

Design refinement and support to bring concepts to functional prototypes.

### CAD Design & 3D Modeling

Precise 2D/3D models and drawings optimized for manufacturing and prototyping.

### Manufacturing Process Consulting

Improve production with layout planning, process flow, and equipment optimization.

### 3D Rendering & Simulation

High-quality visuals, animations, and FEA for design validation and marketing.

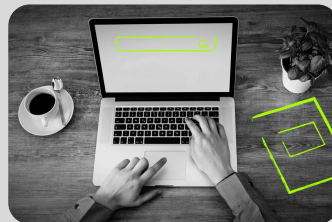

### Product Development Consulting

Expert guidance from concept to production to ensure manufacturable, cost-effective designs.

### Reverse Design & Part Replication

Accurate 3D models and drawings from physical parts for redesign or integration.

### Product Support & Documentation

Create BOMs, manuals, and fabrication-ready drawings for smooth production and support.
